Re: Path-Away

Dear Art,

Thank you so much for the donation of your wonderful product, Path-Away, to my animal sanctuary. As you know, I have severe chemical sensitivities and finding a product that is both highly effective as an antimicrobial and is still non-toxic, has been all but impossible in the past. Path-Away has proven to be both safe for me and effective for treating hoof infections such as thrush and white line disease, and for treating skin infections and wounds with our horses and dogs. It works very quickly without causing any irritation. I am very impressed!

Wishing you great success with marketing your amazing product!

Sincerely,

Catherine Ritlaw

Executive Director

Journey's End Ranch Animal Sanctuary
